

As one of the most experienced manufacturers of bike components in Sweden, we know a thing or two about making great products. Our Kickstands and Carriers come in designs for all types of bikes. Our growing lineup of easily attachable AVS Accessories provides more convenient ways to haul your gear.

For years, we have worked closely with leading bicycle manufacturers in Europe to develop innovative products with a focus on timeless design, functionality, and durability. Thanks to our in-house design and close relationship with manufacturers, we can offer great flexibility and customize products, order placements, and delivery times to our customers' needs.

The AtranVeloSystem is a patented, minimalistic system for securely attaching accessories to your bike. It includes a range of quality bags, baskets, and boxes for different occasions. All AVS accessories are modular and compatible with front and rear carriers. A simple latch allows you to switch, attach, or remove accessories.

In 2018, we received the renowned Red Dot Design Award for our intuitive AtranVeloSystem. The international jury of independent design experts noted an outstanding level of innovation, functionality, user-friendliness, and longevity in their assessment.

AVS is an open system, so manufacturers can license the technology to produce bike accessories for our carriers. Bicycle brands from all over the world use AVS, and we can customize racks to customer requests. We make our own baskets, panniers, bags, wooden crates, and other accessories, but AVS accessories are also available from a growing list of global partners.

BAGS

Whether you use your bike to commute, run errands or go on trips, you need a way to carry your gear. AVS lets you attach, match, mix, and switch bags, baskets, and panniers effortlessly. Our bags are designed to endure harsh Scandinavian weather conditions while enhancing both utility and style.
